

Software

How do I install Office 365 on my computer?

For students, faculty, and staff, please log into <https://www.office.com/> using your Passport York credentials, making sure to add @yorku.ca to the username. For example, if your username is jsmith, the username input would be jsmith@yorku.ca. After logging in, there will be an **install Office** button on the main page. Clicking on it will install the Office suite on your device.

For additional information, please follow this link:
