My students tell me that they cannot see my course on Eclass, how do I make it available to them?

By default when you create a course in Eclass it is hidden from students. To make it available to them, follow these instructions:

1. Go to eclass.glendon.yorku.ca
2. Log into your course.
3. In the red bar at the top of your course there is a "make available" button. Click this and your students will gain access to the course when they next login to Eclass.
